

Financial Controller

Title: Financial Controller

Line Manager: Chief Financial Officer

Location: Paris

Our Company

SparingVision is a genomic medicines company, translating pioneering science into vision-saving treatments. Founded to advance over 20 years of world-leading ophthalmic research from its scientific founders at the Paris Vision Institute, SparingVision is leading a step shift in how ocular diseases are treated, moving beyond single gene correction therapies. At the heart of this is a pipeline of gene independent treatments for rod-cone dystrophies. Lead products, SPVN06 and SPVN20, address mid and late stages of retinitis pigmentosa (RP) respectively. RP is the most common inherited retinal disease affecting two million people worldwide. These novel medicines could form the basis of a suite of new sight-saving treatments with potential applications across many other retinal diseases, regardless of genetic cause.

The Company is supported by a strong, internationally renowned team who aim to harness the potential of genomic medicine to deliver new treatments to all ocular disease patients as quickly as possible. SparingVision has raised €60 million to date and its investors include 4BIO Capital, Bpifrance, Foundation Fighting Blindness (US), Fondation Voir & Entendre, UPMC Enterprises, Jeito Capital and Ysios Capital.
